

**FOR IMMEDIATE RELEASE**

## **Rangeland Midstream Canada Begins Construction of Marten Hills Pipeline System**

SUGAR LAND, Texas, and CALGARY, Alberta – October 16, 2019 – [Rangeland Midstream Canada, Ltd.](#) ("Rangeland Canada"), a wholly owned subsidiary of Rangeland Energy III LLC, today announced it has commenced the construction of its Marten Hills Pipeline System. The system consists of new crude oil and condensate pipelines located in the Marten Hills region of north central Alberta. The Marten Hills Pipeline System will extend approximately 85 kilometres (52.8 miles), terminating at an interconnect with Plains Midstream Canada's Rainbow Pipeline System, which serves the Edmonton, Alberta, hub and refining market (system map [here](#)). The Marten Hills system is expected to come into service in the second quarter of 2020.

The system is anchored by long-term transportation agreements with three of the region's largest crude oil producers, who have made a combined minimum volume commitment representing 40 percent of the system's capacity. The agreements span a 450,000-acre area of mutual interest (AMI) dedicated to the Marten Hills system.

"Rangeland Canada is excited to announce that we have received all of the required permits and regulatory approvals that allow us to begin clearing rights of way in advance of pipeline construction, which is expected to begin later this month," said Rangeland Canada Vice President of Business Development Briton Speer. "The Marten Hills system will alleviate infrastructure bottlenecks and allow us to provide our customers with flow assurance and the safe, high-quality transportation services they need to access the best markets."

### **About Rangeland Energy and Rangeland Midstream Canada**

Headquartered in Sugar Land, Texas, Rangeland Energy was formed in 2009 to focus on developing, acquiring, owning and operating midstream infrastructure for crude oil, natural gas, natural gas liquids and other petroleum products. The company is focused on emerging hydrocarbon production areas across North America, with a current emphasis on the Gulf Coast and Canada. Rangeland Midstream Canada, Ltd., a subsidiary headquartered in Calgary, was formed in 2016 to serve oil and gas producers in western Canada with a full suite of midstream services including oil and gas gathering, processing, terminaling and transportation. The Rangeland Canada team has significant expertise in designing, constructing and operating midstream assets in the Western Canadian Sedimentary Basin. The Rangeland team represents more than 200 years of combined midstream experience and is backed by growth capital commitments from EnCap Flatrock Midstream. **About EnCap Flatrock Midstream**

EnCap Flatrock Midstream provides value-added growth capital to proven management teams focused on midstream infrastructure opportunities across North America. The firm was formed in 2008 by a partnership between EnCap Investments L.P. and Flatrock Energy Advisors, LLC. Based in San Antonio with offices in Oklahoma City and Houston, the firm manages investment commitments of nearly \$9 billion from a broad group of prestigious institutional investors. EnCap Flatrock Midstream is currently making commitments to new management teams from EFM Fund IV, a \$3.25 billion fund.
